

Wood  
Burning  
Stoves

# Neo 1.2 Short

The NEO 1.2 Short offers a large 5kW heat output in its compact design to ensure domestic users receive optimum heat. This is aided by an optional fan system which releases air from the stove into the room, increasing heat and efficiency.

With short legs and a petite shape, the Neo 1.2 Short can be used both freestanding and integrated within chimney breasts to maximise space. Combine this with easy loading and an ample glass screen to give excellent clear views of the flame, as well as a 15 year warranty, the NEO 1.2 offers the perfect focal point in any space.

- **AIR WASH** a system by pacific energy
- **BAFFLE SYSTEM**
- **EBT2 EXTENDED BURN** technology
- **FLOATING FIREBOX**
- **KNIFE EDGE DOOR**
- **SINGLE LEVER - AIR CONTROL**
- **TWO SPEED BLOWER (optional)**

## Specialist Technology

### Air wash

The first of its kind in the industry, Pacific Energy's air wash manifold system helps pre-heated air flow towards the glass surface in order to keep it clean, even in low air settings.

### Baffle System

Providing a long-life, reliable and clean burning EPA phase II EFFICIENCY, The Baffle system is Pacific Energy's central component of the non-catalytic high capacity second combustion system.

### Floating Firebox

Giving vital components the room to freely expand and contract as the stove heats up and cools down, this industry leading design offers an unmatched long stove life and quiet operation.

### EBT2 Extended Burn Technology

Being able to accurately regulate secondary airflow for a longer, cleaner and more economical burn, Pacific Energy's Extended Burn Technology offers optimum heat – on select models only.

### Two Speed Blower (Optional)

140cfm temperature actuated variable speed blower.

### Knife Edge door

Created to ensure an air tight seal to the gasket, the formed and welded knife edge opening by Pacific Energy strengthens the stove face while offering a secure fastening.

### 15 year manufacturer warranty

Waxman Heating is exclusively selling Pacific Energy stoves with a 15 year manufacturer warranty on the full range of wood burning stoves, throughout the UK and Ireland. 3 year parts & labour guarantee included.

### Smoke Control Area Exempt

Waxman Heating's entire range of wood burning and multi-fuel stoves is now on the Defra Exempt Appliances list, which means each stove is suitable for use in smoke control areas when burning manufacturer specified fuels.

### HETAS Approved

Each stove in Waxman Heating's entire solid fuel range is now HETAS Approved. This means that we can now give all customers a range of industry backed products that meet the high standards HETAS represents.

Waxman Heating Limited accepts no responsibility or liability for, and gives no representation or warranty as to, the accuracy, reliability or completeness of the information or images provided in this datasheet.
